

Chick take-off system

Chick take-off system, type CTOS-1

The chick belt of the Pas Reform chick take-off system is placed partly under a non-driven roller conveyor for hatcher baskets to give space to four operatives.

The roller conveyor can be connected to a tray tipping system. The chicken conveyor is controlled by the chick counter.

Technical Specifications

Length roller conveyor	3 meters
Length chicken conveyor	2.7 meters
Width chicken conveyor	0.25 meters
