

Specialized Engineering Services

The Pas Reform Project Management team works hand-in-hand with your company to develop hatchery-specific strategies that optimise the most efficient, performance-enhancing combination of incubators, hatchery climate control systems and automation systems.

Possible design specifications contained in this package (based on Pas Reform incubators)

- Basic Engineering Design +
- Detailed drawing package of layouts for future expansions
- Hatchery side view layouts
- Hatchery specific incubator layouts
- Cold water, warm water and cooling water principle drawings
- General hatchery climate control drawings for setter and hatcher rooms (including connection points for hatchery climate control equipment)
- Layouts of light requirements and positioning
- Electrical, cooling water, hot water, cold water and air consumption logic diagrams
- Hatchery climate control layouts
- Hatchery automation systems layouts
- 1 field site visit before installation of the Pas Reform equipment
