

Project commissioning

Because we never underestimate the importance of people to the success of any hatchery operation, we have developed a dedicated training centre to provide tailor-made training programmes for hatchery professionals.

Highlights

- Safety
- Equipment start-up and commissioning
- User training and equipment orientation
- Incubator maintenance
- Trouble-shooting
- Hatchery automation
- Hatchery climate control

This workshop has a very interactive component and delegates will be regularly involved in break-out sessions and in discussing how the subject covered can be applied to their own situation.
